JIM ROGERS
District 3 Director

Board Actions
MAY 2025

Approved the
Department
Production and
Financial Reports.

Patrick started at Carbon on March 21, 2016 as an Engineering Technician. He enjoys spending time outside rafting, canoeing, kayaking, hunting and camping. He has his Associates in Forest Management from Dabney's Lancaster Community College in VA. His family is made up of his wonderful wife, Leslie, who is an English teacher in Encampment 7-12 and two children, Jamis 12 and Anna 10. Patrick's last day will be **August 14, 2025**.

Member-Owned Service - Proud

JIM BECKMANN, GENERAL MANAGER

Well, it's an honor to be writing my first article for the WREN as the Manager of CP&L. There have been a number of great managers before me, and I have some big shoes to fill. I have had the opportunity to work with a couple of them during my time here at Carbon. As did my predecessors in this position, it is my goal to do the best job that I can to serve the membership, board, and employees of CP&L.

There is a lot going on in the electrical industry right now with rates, regulations, wildfire mitigation, data centers, generation sources, non-utility generators, regional trade organizations, etc. Though staying on top of what is happening in all these areas is crucial to my job; it boils down to Carbon Power's continued commitment to providing safe, reliable,

and affordable electricity to you, the members.

I am excited to serve in my new capacity to work to that end. I have been involved in distribution engineering for 20 years and have worked here at Carbon for the last 15 years first as a Staking Engineer, then Superintendent of Engineering and most recently as Director of Engineering. The change in roles will be refreshing but I'm still working toward the same goal as is any dedicated electric cooperative employee, providing the best possible service for the membership.

If you have any questions, please don't hesitate to reach out. At CP&L we are here for the members, the owners of the cooperative. Your involvement in your cooperative makes a difference, so please let us know if there is anything we can do for you. I look forward to hearing from and working with you as we continue this cooperative journey into the future.

Thank you for taking the time to read this – Jim.

ENERGY EFFICIENCY

TIP OF THE MONTH

During summer months, run large appliances that emit heat such as clothes dryers and dishwashers during the evening when the outdoor temperature is lower. Running heat-emitting appliances in the evening will reduce indoor heat gain during the day when outdoor temperatures are highest and ultimately keep your air conditioner from working harder than necessary.
